

SureLock® II Compact Cartridge Wire Staple Gun

New from North American Green

North American Green has made the quickest, easiest, most efficient way to install RECPs, geotextiles, sod, and any other materials that must be secured to the ground even better!

The **NEW** SureLock II Compact Cartridge Wire Staple Gun® (F300CS/F300CPS) features all the design and field advantages found in its predecessor, the full-sized SureLock II Cartridge Wire Staple Gun® (F300S/F300PS):

- Constructed of all the same heavy-duty stainless steel, aluminum and plastic components which resist corrosion, reduce drag and wear, prevent part seizing, enable simple water cleanup, and require only periodic lubrication
- Features an open-barrel drive system design which allows simple cleanup, enables self-clearing of bent staples, and reduces the need for lubrication in dirty environments
- Easily converted from a manual-handled unit to a pneumatic-handled unit, and vice versa, in a matter of minutes
- Has an adjustable staple track so it can always be field adjusted to feed properly
- Uses the same cartridges of 24 6-inch, 11-gauge wire staples
- Field repairable, with predominantly standard replacement parts

What's the difference between the new SureLock II Compact and the full-sized version?

Loaded or unloaded, the SureLock II Compact is lighter and, as a result, easier to carry and easier to handle!

- 7.76 inches shorter, holding three cartridges (72 staples) rather than five cartridges (120 staples)
- 2.75 lbs. lighter unloaded
- 4.675 lbs. lighter fully-loaded

| | HANDLE | CARTRIDGE CAPACITY | UNLOADED WEIGHT (LB.) | LOADED WEIGHT (LB.) | HEIGHT (IN.) | LENGTH (IN.) | WIDTH (IN.) |
